ISRO START PROGRAMME 2026

All Staff Members, PG Students, and Final Year UG Students are hereby informed that our University has been recognized as a Nodal Centre for the ISRO START (Space Science and Technology Awareness Training) Programme. The programme, organised by ISRO, aims to motivate students towards Space Science and Technology through introductory lectures on space science, Indian space missions, and research opportunities. The online training is tentatively scheduled during March 2026 and will be conducted for 2–3 hours per day over a period of 2–3 weeks, followed by an online examination.

PG students and Final Year UG students of Physical Sciences and Technology disciplines are eligible to apply. Participants must maintain a minimum attendance of more than 70% in the live online sessions to become eligible for the examination, and students must secure 50% marks in the online examination to receive a merit certificate.

Last Date of registration: 28/02/2026
