To,

All 1st year UG and Diploma Students

Subject: **Thalassemia Awareness Camp**

Season's Greetings,

Dear All,

Thalassemia is a genetic disorder that affects the production of haemoglobin, a protein in red blood cells that carries oxygen to the body's tissues. Thalassemia is inherited to the young ones from the parents.

Symptoms of Thalassemia include Anaemia (low red blood cell count), Fatigue, weakness, Pale skin, Enlarged spleen and Bone deformities. These are very painful condition for both parents and a child.

The treatment of Thalassemia is very tedious, expensive and painful as parents and a child both will have psychological and emotional trauma for undergoing treatment. The treatment includes blood transfusion on regular interval and in some cases even bone marrow transplantation also needed to be done.

This can be prevented by proper counselling of students and raising awareness.

As per the UGC guideline we are organising Thalassemia awareness camp at our university campus for **first year students of DSU admitted in the year 2026-27.**

Kindly note the following:

1. Blood test will be carried out for all the students **admitted in first year B. Tech, B. Pharm, B. Sc., BBA, B. Com and Diploma Engineering** during the **Academic Year 2026-27**. It is compulsory for all students to take the Thalassemia test.
2. Students **will not have to pay for this test.**
3. The students who have already taken this Thalassemia test have to submit their report to their respective Class Councillor on or before 28th October, 2026.
4. Schedule and venue of the camp is as under:
Date: 29th October, 2026
Time: 9:00 AM to 12:30 PM
Venue: Dr. Subhash Ayurvedic & General Hospital – Junagadh

Thank you,

Dr. J. J. Patel,
The Registrar,
Dr. Subhash University,
Junagadh
